At a cost of around \$2 billion, the Parkland school campus, which has been ravaged by the massive fire that has ravaged the west coast of Florida, will be rebuilt at the same size. Hundreds of firefighters and firefighters are still working at the school as the fire recedes, but it is still raging hard. Despite the impressive scale of the fire, no lives have been lost. The Red Cross was opening shelters, as the five district schools remain closed. The local emergency services have covered the massive area of the fire and say they have little more to do. Meanwhile, the Florida Department of Law Enforcement are investigating the incident.Fibrosis. Comorbidities and mortality. Fibrosis, whether caused by various causes or of unknown cause, may lead to associated comorbidities. The underlying mechanisms in fibrosis are not fully understood, but insulin resistance and the metabolic syndrome are likely important. This and other factors may be important in the development of comorbidities, including kidney disease. The best model of the comorbidities is the diabetic kidney disease, which has been recognized for about a century. Insulin resistance is an important factor, and may also influence progression of kidney disease. In the developed world, the risk factors for fibrosis, including comorbidities, may increase. Although definitive risk factors are not fully understood, genetic, dietary, lifestyle, and other factors may influence progression of fibrosis. Progression of fibrosis is associated with increased mortality. The rates of fibrosis progression, associated comorbidities, and mortality need
