Features Key:

- A unique rhythm and sound that combines traditional marimba sounds with the new, high-energy drum sounds; player 3 is a double-kick machine.
- Improvisational gameplay that combines a series of accurate tremolo marimba and drum sounds with ever-varied rhythmic patterns.
- 12 different patterns, each covering a different drum set or mode:
- Tresillo Drexler is a Latin percussionist who has developed his "Drum Machine" sounds over the last 20 years. Anyone who plays guitar, percussion, or bass, who wants to incorporate the new high energy drum sounds will find Drexler's rhythms a real asset.
- Two different play options: you can break the patterns up into individual phrases, or just hit the note as a single solo texture.
- Huge user friendly interface with easy understandable table of drum pattern effects.
- Each pattern drum chart comes with both a harmony (all notes played with a single stroke of the keyboard) and chord (all notes played simultaneously) accompaniments to allow for combination of voicing and stroke division on the pianist's part.
- Special Sounds:
 - Fast, rhythmic, drum sounds that are designed for tremolo and blast playing on single notes.
 - Classic Tresillo and Cuban style drum sounds that involve the hi-hat for either perfect playing or compromise playing (two hi-hats per note).
 - Unique electronic drums that are designed for a single stroke of the keyboard: a great way to improve your bass, guitar or clarinet playing.
 - A square hit sound, which is a traditional sound for marimba patterns. All of the patterns have a satisfying square hit sound.
 - Big and small grunts, toms, jangles, and rattles.
 - Other Specials: A useful big "umph!" effect to spice up a pattern or fill a whole phrase. Also a blast effect with great beginning/end. Useful for introducing the snap and end of a whole phrase when playing

GUITAR DRUMMER" called Drummer-Quest. The band features Alex Stefan on vocals and John Demonte on drums, with Jim Irvine on bass, Mike Dobson on guitar and Michael Stauffacher on percussion. Following a successful debut run in South America during the 2006/2007, DrummerQuest: "LOVE-MUSIC KNOW-FOREVERLOOPS" has since made its mark in Europe where it premiered at the prestigious Aktel Open Festival, Germany and at Self Help Festival in Portugal. Track listing References Category:2005 albumsPimax One, which was announced back at CES 2017, hasn't really been talked about since then. However, in the run-up to the CES show this year it has made the news a fair bit. It is now official that Pimax will launch their first GPU-based VR headset in 2017 - codename Pimax One. They will start selling it in September and they are aiming for a price of \$799. This is a self-contained VR headset and does not need a PC. You will be able to play all the VR games that are out there now; which right now is a majority of them, but it will definitely grow in the years to come. Pimax One will come with a 1080p screen and use a single headset. More details on the first Oculus Rift competitor, Pimax One, will be announced on the 6th of May at the North American International Toy Fair in New York.
